Hawaii Area Wide Fruit Fly
Integrated Pest Management Program

Monitoring: Male Lures

- Male lures or pheromones are attractive to the *male* fruit fly.
- Male lures do not contribute to increased number of damaging females.
- Purchase and use of fruit fly lures does not require a pesticide license.

- Each lure is specific to a fruit fly group or species.

**Oriental Fruit Fly**
- Methyl Eugenol

**Melon Fruit Fly**
- Cuelure

**Mediterranean Fruit Fly**
- Trime lure/Biolure Medfly

**Malaysian Fruit Fly**
- Latilure + Cade Oil
